

Left column begins the story of the canal walk. left-item-1 Paragraph 1: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 1 belong to the reader who saved them, in a folder that outlives any account. left-item-2 Paragraph 2: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 2 belong to the reader who saved them, in a folder that outlives any account. left-item-3 Paragraph 3: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 3 belong to the reader who saved them, in a folder that outlives any account. left-item-4 Paragraph 4: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 4 belong to the reader who saved them, in a folder that outlives any account. left-item-5 Paragraph 5: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 5 belong to the reader who saved them, in a folder that outlives any account. left-item-6 Paragraph 6: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 6 belong to the reader who saved them, in a folder that outlives any account. Right

column continues after the aqueduct. right-item-11 Paragraph 11: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 11 belong to the reader who saved them, in a folder that outlives any account. right-item-12 Paragraph 12: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 12 belong to the reader who saved them, in a folder that outlives any account. right-item-13 Paragraph 13: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 13 belong to the reader who saved them, in a folder that outlives any account. right-item-14 Paragraph 14: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 14 belong to the reader who saved them, in a folder that outlives any account. right-item-15 Paragraph 15: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 15 belong to the reader who saved them, in a folder that outlives any account. right-item-16 Paragraph 16: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 16 belong to the reader who saved them, in a folder that outlives any account.
