

Long document page 1 of 100. Paragraph 1: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 1 belong to the reader who saved them, in a folder that outlives any account.

Long document page 2 of 100. Paragraph 2: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 2 belong to the reader who saved them, in a folder that outlives any account.

Long document page 3 of 100. Paragraph 3: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 3 belong to the reader who saved them, in a folder that outlives any account.

Long document page 4 of 100. Paragraph 4: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 4 belong to the reader who saved them, in a folder that outlives any account.

Long document page 5 of 100. Paragraph 5: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 5 belong to the reader who saved them, in a folder that outlives any account.

Long document page 6 of 100. Paragraph 6: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 6 belong to the reader who saved them, in a folder that outlives any account.

Long document page 7 of 100. Paragraph 7: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 7 belong to the reader who saved them, in a folder that outlives any account.

Long document page 8 of 100. Paragraph 8: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 8 belong to the reader who saved them, in a folder that outlives any account.

Long document page 9 of 100. Paragraph 9: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 9 belong to the reader who saved them, in a folder that outlives any account.

Long document page 10 of 100. Paragraph 10: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 10 belong to the reader who saved them, in a folder that outlives any account.

Long document page 11 of 100. Paragraph 11: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 11 belong to the reader who saved them, in a folder that outlives any account.

Long document page 12 of 100. Paragraph 12: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 12 belong to the reader who saved them, in a folder that outlives any account.

Long document page 13 of 100. Paragraph 13: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 13 belong to the reader who saved them, in a folder that outlives any account.

Long document page 14 of 100. Paragraph 14: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 14 belong to the reader who saved them, in a folder that outlives any account.

Long document page 15 of 100. Paragraph 15: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 15 belong to the reader who saved them, in a folder that outlives any account.

Long document page 16 of 100. Paragraph 16: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 16 belong to the reader who saved them, in a folder that outlives any account.

Long document page 17 of 100. Paragraph 17: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 17 belong to the reader who saved them, in a folder that outlives any account.

Long document page 18 of 100. Paragraph 18: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 18 belong to the reader who saved them, in a folder that outlives any account.

Long document page 19 of 100. Paragraph 19: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 19 belong to the reader who saved them, in a folder that outlives any account.

Long document page 20 of 100. Paragraph 20: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 20 belong to the reader who saved them, in a folder that outlives any account.

Long document page 21 of 100. Paragraph 21: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 21 belong to the reader who saved them, in a folder that outlives any account.

Long document page 22 of 100. Paragraph 22: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 22 belong to the reader who saved them, in a folder that outlives any account.

Long document page 23 of 100. Paragraph 23: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 23 belong to the reader who saved them, in a folder that outlives any account.

Long document page 24 of 100. Paragraph 24: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 24 belong to the reader who saved them, in a folder that outlives any account.

Long document page 25 of 100. Paragraph 25: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 25 belong to the reader who saved them, in a folder that outlives any account.

Long document page 26 of 100. Paragraph 26: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 26 belong to the reader who saved them, in a folder that outlives any account.

Long document page 27 of 100. Paragraph 27: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 27 belong to the reader who saved them, in a folder that outlives any account.

Long document page 28 of 100. Paragraph 28: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 28 belong to the reader who saved them, in a folder that outlives any account.

Long document page 29 of 100. Paragraph 29: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 29 belong to the reader who saved them, in a folder that outlives any account.

Long document page 30 of 100. Paragraph 30: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 30 belong to the reader who saved them, in a folder that outlives any account.

Long document page 31 of 100. Paragraph 31: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 31 belong to the reader who saved them, in a folder that outlives any account.

Long document page 32 of 100. Paragraph 32: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 32 belong to the reader who saved them, in a folder that outlives any account.

Long document page 33 of 100. Paragraph 33: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 33 belong to the reader who saved them, in a folder that outlives any account.

Long document page 34 of 100. Paragraph 34: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 34 belong to the reader who saved them, in a folder that outlives any account.

Long document page 35 of 100. Paragraph 35: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 35 belong to the reader who saved them, in a folder that outlives any account.

Long document page 36 of 100. Paragraph 36: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 36 belong to the reader who saved them, in a folder that outlives any account.

Long document page 37 of 100. Paragraph 37: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 37 belong to the reader who saved them, in a folder that outlives any account.

Long document page 38 of 100. Paragraph 38: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 38 belong to the reader who saved them, in a folder that outlives any account.

Long document page 39 of 100. Paragraph 39: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 39 belong to the reader who saved them, in a folder that outlives any account.

Long document page 40 of 100. Paragraph 40: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 40 belong to the reader who saved them, in a folder that outlives any account.

Long document page 41 of 100. Paragraph 41: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 41 belong to the reader who saved them, in a folder that outlives any account.

Long document page 42 of 100. Paragraph 42: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 42 belong to the reader who saved them, in a folder that outlives any account.

Long document page 43 of 100. Paragraph 43: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 43 belong to the reader who saved them, in a folder that outlives any account.

Long document page 44 of 100. Paragraph 44: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 44 belong to the reader who saved them, in a folder that outlives any account.

Long document page 45 of 100. Paragraph 45: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 45 belong to the reader who saved them, in a folder that outlives any account.

Long document page 46 of 100. Paragraph 46: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 46 belong to the reader who saved them, in a folder that outlives any account.

Long document page 47 of 100. Paragraph 47: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 47 belong to the reader who saved them, in a folder that outlives any account.

Long document page 48 of 100. Paragraph 48: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 48 belong to the reader who saved them, in a folder that outlives any account.

Long document page 49 of 100. Paragraph 49: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 49 belong to the reader who saved them, in a folder that outlives any account.

Long document page 50 of 100. Paragraph 50: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 50 belong to the reader who saved them, in a folder that outlives any account.

Long document page 51 of 100. Paragraph 51: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 51 belong to the reader who saved them, in a folder that outlives any account.

Long document page 52 of 100. Paragraph 52: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 52 belong to the reader who saved them, in a folder that outlives any account.

Long document page 53 of 100. Paragraph 53: the archive stores what you read, not what a service allows you to see. Files are the truth; indexes are disposable. Rest stop notes, canal walks, and heron counts 53 belong to the reader who saved them, in a folder that outlives any account.
